

Adult Nutrition in Lincoln County

Findings from the 2015 Southwest Minnesota Healthy Communities Survey

The 2015 Southwest Minnesota Healthy Communities Survey was conducted to learn about the health and health habits – physical activity, nutrition, tobacco use, dental health, and mental health – of residents living in 16 counties in southwest Minnesota. Southwest Health and Human Services contracted with Wilder Research to produce summary reports for each of the six counties in their service area. This fact sheet summarizes survey results related to the nutrition habits of adult residents in Lincoln County.

The survey was conducted April through July 2015 and was sponsored in part by the participating counties’ grants from the Minnesota Department of Health’s Statewide Health Improvement Program (SHIP).

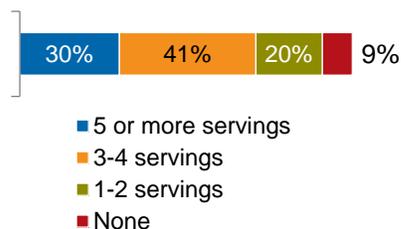

In the reporting of results that follows, when it is stated that respondents’ answers to a survey item increased or decreased, this is referring to a change of 10 percentage points or more in respondents’ answers from the 2010 to the 2015 county survey.

Eating habits

Fruits and vegetables

The CDC recommends that adults eat five or more servings of fruits and vegetables every day. On the day prior to taking the survey, less than one-third of Lincoln County residents ate five or more servings of fruits and vegetables. Unfortunately, 2015 data regarding fruit and vegetable consumption is not comparable to 2010 data due to question wording.

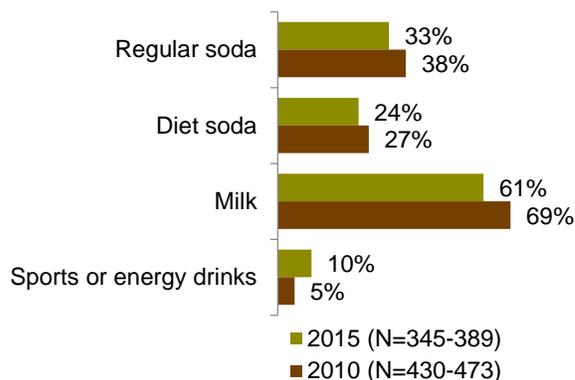

NUMBER OF SERVINGS OF FRUITS AND VEGETABLES ATE YESTERDAY (N=368)

Beverages

Soda consumption has been linked to lower levels of calcium in the body, which is a contributing factor in osteoporosis in adults and broken bones in children. Many sodas have large amounts of caffeine, and regular soda has approximately 150 calories per serving, with no nutritional value. In addition, the high amount of sugar in regular soda has become a health concern. Thirty-three percent of Lincoln County residents drank regular soda on the day prior to taking the survey.

BEVERAGES CONSUMED YESTERDAY

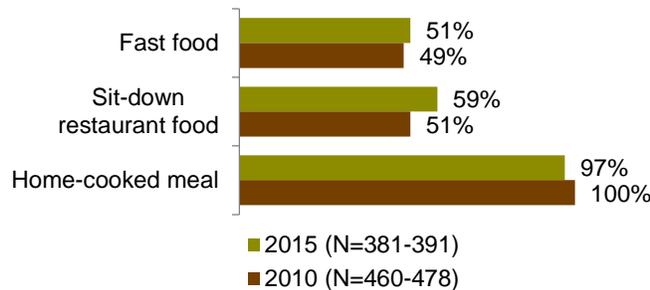

Eating out and eating in

Over half of Lincoln County residents eat fast food at least once in a typical week. Over half eat at least once at a restaurant that is not fast food in a typical week. Most respondents who eat out do so twice per week or less.

Nearly all (97%) of Lincoln County residents eat at least one home-cooked meal in a typical week and over half (54%) eat a home-cooked meal every day. Twenty-one percent of Lincoln County residents watch TV while eating a meal daily, while over one-quarter (29%) of residents never watch TV while eating a meal. All of these factors are related to the degree to which an individual is likely to meet their nutritional needs.

EATING OUT AND EATING IN ONE TIME OR MORE IN AN AVERAGE WEEK

Access to nutritious food

One focus of the Statewide Health Improvement Program (SHIP) is to increase access to community resources and support by improving policies, systems, and environments. Nutrition and healthy eating is a key focus area of SHIP.

Grocery shopping

Eighty-eight percent of residents agree with the statement, “There is a large selection of fresh fruits and vegetables where I usually shop.” And 86 percent of residents agree that the fresh fruits and vegetables where they shop are of high quality. However, 57 percent of residents also agree with the statement, “The fresh fruits and vegetables where I shop are too expensive.”

Over half (52%) of Lincoln County residents travel more than 20 miles (one way) to get their groceries. Respondents are most likely to shop once a week or more for food at a grocery store or supermarket.

IN A TYPICAL MONTH, HOW OFTEN DO YOU BUY OR GET FOOD FROM A...(N=340-385)

During the growing season, about half of Lincoln County residents get food from a home or community garden, but far fewer get food from farmers markets and Community Supported Agriculture.

DURING THE GROWING SEASON, HOW OFTEN DO YOU BUY OR GET FOOD FROM A...(N=360-384)

Food insecurity

Seventeen percent of Lincoln County residents reported that in the past 12 months they often or sometimes worried that their food would run out before they had money to buy more, and 9 percent said that they had used a community food shelf program in the past 12 months.
